**Binaural Beats-** Based on the wildly successful Deep Mind series developed by Exceed International in 1999, the CD harmonics nudge the user from the hectic Beta brain state down into the euphoric Theta state where hypnotic reprogramming easily penetrates the mind and unleashes a payload of life-enhancing suggestions. Seeming to come from within your own consciousness, these suggestions ultimately hotwire your brain and spark radical change.. to unlimited

possibilities. There's more. The binaural beats we utilize further attune certain energy centers (chakras) by resonating at special frequencies. You will feel throbbing sensations, a lightening of your spirit and a sudden expansion of your consciousness. It's like taking a roller coaster ride into the astral planes of your psyche.

#### Subliminal programming-

Embedded within the binaural harmonic matrix are irresistible suggestions crafted to transform your behavior and recreate you into a powerhouse of charisma, energy and boundless vitality. Within the first few minutes, the suggestions will barely be audible, but as you sink into an altered state of consciousness, your mind will fully hear them, absorbing them like a sponge and smoothly integrating them into your being.

**NLP-** As we are well aware Neurolinguistic Programming is naturally the most persuasive form of communication ever created now. What if NLP were used on YOU to reshape your mind for the better? Our CD deploys subliminal suggestions crafted with NLP affirmations in the imperative and permissive modes to

home in on both the left and right hemispheres of the brain. To date, we are one of the few to utilize such techniques .

#### USAGE

Find a quiet place, plug in your high quality headphones, sit/lie down then listen to a sound track. Three soundtracks (Aura Explosion , Instant Charisma and Power Assertiveness) utilize hidden messages buried in the sound matrix to reprogram your mind in a "self-hypnosis" style. As the sound matrix lulls you into a state of supreme relaxation, your brainwaves settle on the theta frequency and the hidden messages become very clear to your subconscious. The magic then begins! Simply allow the messages to enter you and turbocharge your thinking for success.

It takes about a month of daily listening (40mins per day) to see the radical changes these CDs provide. Focus on one track for a month then when you're satisfied with the results, feel free to move on to the next track. This way, you allow your brain to focus on a task at a time.

The Hidden Affirmations

In order to fully exploit the powers

of these CDs, it would be better to see the list of hidden affirmations after you feel that your mind had acquired the desired changes. Knowing the affirmations in advance may dilute the efficacy of the subliminals. After a month or two of listening to the CDs, email us at support@xtrememind.com and we shall respond with the affirmation list. **Note:** Adjust the volume until you no longer hear the "high pitched ultrasonic squeal". This is the Tomatis effect pumping in subliminals at frequencies above 10,000Hz.
